top quality wine cellars

# Beautiful and top quality wine cellars

We love our job and our mission: this allows us to design the most exquisite customized wine cellars. Putting together only top quality natural materials with refined design, we are able to create unique environments which will please any request.

---

We design customized and comfortable wine cellars, where our customers can store their best wines, combining functional efficiency with the aesthetic taste of our days. Using only the best materials and the best available technologies, we are capable of creating wine cellars which can produce an elegant and refined atmosphere. We are professional artisans who put a lot of passion in every detail and

we are sure that our solutions will always be able to offer the most appropriate cellar which will match your tastes. The result will be an exquisite wine cellar, a perfect place to invite friends, collaborators or customers: a cellar to live. We believe in our work and in our mission, and we assure you that the final result of any of our wine cellars will always match with your requests and with your requirements.

# The ideal wine cellar

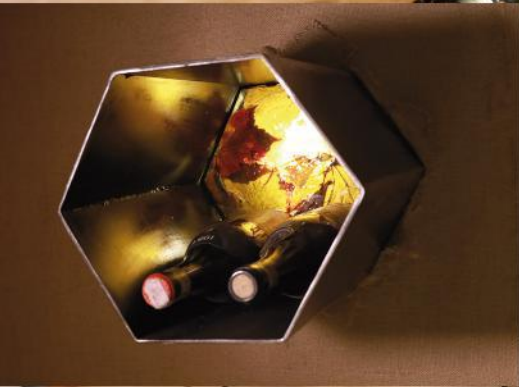

The mission of Winest is the fulfilment of perfect wine cellars, which means perfection in every detail, a design and a construction performed in order to follow the customer's taste and wishes, and at the same time also the compliance of every criteria of functionality and practicality for a correct preservation of wines.

---

A wine cellar is a place that can transform any wine into emotions, therefore, the cellar becomes ideal only if the fulfilment follows two crucial complementary criteria. The first criterion is objective: it requires the compliance of every technical parameter for an optimal preservation of the bottles, in order to allow a pleasant long stay of the wines in the cellar.

The second criterion is subjective: the wine cellar must be beautiful, it must please the customer, therefore, the cellar must be customized in every detail. An ideal cellar must observe the correct parameters of humidity, temperature and brightness; the bottles must be protected from any eventual external vibration and from any harmful smell which could compromise the quality of the wines.

# Top quality materials

In Winest we own a significative experience and a specific technical knowledge and we know how to select the best materials for the fulfilment of wine cellars. We choose only materials which allow a perfect combination of aesthetic taste and functionality.

---

**W**e know perfectly that refined wine cellars require materials which must be selected very carefully. Both in the case that the materials will be used for shelves employed for the collection of the most precious wines, and in the other case that the materials will be used for customized details, we will always choose top quality materials with a high durability.

Our experience in the construction sector joins our continuous research of the latest design trends of wine cellars.

We will introduce in your cellar the best appeal and the warmth of the most beautiful woods, the firmness and the refinement of the most noble stones and metals, using our craftsman's knowledge and our expert and competent hand.
